Fine and Dandy Mixture

Mixture of perennial ryegrass and creeping red fescue makes this blend excellent for parks, playgrounds, home play areas, athletic fields, golf courses, rough areas, and fairways. This mixture makes a beautiful and tough turf. Developed for the Northwest Fine 'N Dandy has excellent winter color, early spring green up and good disease resistance. These characteristics is what sets Fine 'N Dandy above the rest.

This mixture is enhanced with Acremonium endophyte to provide improved resistance to several turf grass insects. The mixture of perennial ryegrass and creeping red fescue are characterized by a fine leaf texture, rapid establishment, partial shade tolerance, excellent density, wear resistance and natural dark green color. Fine 'N Dandy is a mixture of superior seed that has proven performance over time.
